

Research Assistant/Associate in Manhasset, NY

Position Description

Our laboratory is seeking an energetic and highly motivated Research Assistant or Associate to work in the intersecting disciplines of immunology and neuromodulation. The candidate will be responsible for assisting SetPoint's research and discovery team in conducting a broad range of experiments, from in vitro mammalian cell culture to translational clinical research, all with the ultimate goal of delivering a novel treatment intended to improve the lives of patients with chronic inflammatory disease. The selected candidate will work under the guidance of senior research scientists and clinical leadership to execute preclinical work as well as perform laboratory assays on clinical samples during all stages of the therapy development.

The candidate will conduct the vast majority of preclinical work from our lab space within the Feinstein Institute for Medical Research in Manhasset, New York.

Position Responsibilities

- Assist senior scientists to conduct experiments
- Acquire, analyze and present data from cell culture and clinical studies.
- Perform independent research with general guidance
- Help with maintenance and organization of lab

Qualifications

- Minimum of Bachelor's degree in Biological/Life Sciences required.
- Industrial or academic lab experience (2-5 years) strongly preferred.
- Neat and well organized, with the ability to handle multiple tasks.
- Experience with protein analysis techniques (e.g. Western blot, ELISA) required. Experience in RNA/DNA techniques (e.g. qPCR) a plus.
- Animal handling experience is desirable.
- Demonstrated technical proficiency and ability to collaborate with others.
- Excellent analytical, organizational, communication and computer skills.
- Practical problem-solving skills and the ability to work both independently and as a contributing member of a research team.
- Able to learn complex tasks with general instruction
- Actively seeks opportunities to increase skills and expertise
- The highest of ethical standards.

Company Description

SetPoint Medical is an early stage medical device company developing the first implantable neurostimulation device for the treatment of chronic inflammation.
